-Letters To The Editor-

Food For China

Sir: Mr. Pharr's letter of December 30 expresses a commendable humanitarian motive in recommending that America "let a little love flow to the people of China." Mr. Pharr presumably is suggesting that Congress should send food to China "to fill empty stomachs."

Chinese intelligence observers believe that the Red Chinese have purposely released and emphasized stories of crop failures to hide from the suffering Chinese people the fact that their Communist Government has taken the food needed by the Chinese and have been exporting it—for propaganda purposes—to several countries,

including Cuba. Ulius L. Amoss.

Baltimore, Jan. 5.
